

ABSTRACT OF THE DISCLOSURE

5 A facsimile system includes a facsimile machine reading  
image data from an original, a computer transmitting to and  
receiving from the facsimile machine data of addressee  
identification information indicative of at least a name of  
addressee and a facsimile number corresponding to the name of  
addressee, a computer-side storage circuit provided at a  
computer side for storing the data of addressee identification  
information, a computer-side referring circuit provided at the  
10 computer side for referring to the data of addressee  
identification information stored in the computer-side storage  
circuit, and an instruction circuit provided in the facsimile  
machine so as to be instructed at a facsimile machine side to  
refer via the computer-side referring circuit to the data of  
15 addressee identification information stored in the computer-  
side storage circuit.
